

## Better water means better living.

Aquasential™ Select Plus Series™ Iron-OX5™ Water Filter

### SYSTEM BENEFITS

- An environmentally-friendly filter system that uses no chemicals
- Affordable system for removing moderate levels of iron from water
- Uses the natural process of oxidation
- Prevents rust stains and orange spots on laundry and wash machines
- Increases life of appliances and fixtures

### Environmentally-friendly iron reduction solution.

Problem water takes on many different aspects: The unsightly red and orange stains on your bathroom fixtures and the ugly rust stains on your clothes, dishes or in your pet's water bowl can be caused by the presence of iron in your water.

Culligan has guaranteed solutions to these and other water problems you may have. All Culligan filters are customized to handle your specific type of problem water.

The Aquasential Select Plus Series Iron-OX5 Water Filter is the simple and affordable way to give you cleaner, safer water and more peace of mind.

## Product Specifications

### Natural Aeration Technology:

- The key to the chemical-free Iron-OX5 system is the aeration process which oxidizes dissolved iron to filterable particles without the need for any chemicals.
- The Iron-OX5 system automatically keeps the aeration process active in a simple single tank design.
- The included bypass valve provides the convenience of bypassing the water filter if needed.
- Exclusive Culligan Soft-Minder® meter monitors and records daily water use and the electronic circuit board retains regeneration data.
- The easy to read back-lit display with digital clock lets you know your filter is working and warns of system malfunctions.

### Exclusive reliable design:

- Exclusive, non-corrosive valve. The motor-driven pistons provide a high level of performance and reliability in problem water applications.
- System includes inlet and air line check valves and a stainless steel strainer on the air intake.
- Sturdy fiberglass media tank with filament-wound exterior, and smooth, non-permeable inner tank shell designed for years of continual service.

### Unique Media Filter:

The media used in the filter tank acts as a catalyst to enhance the reaction between the oxygen and iron. A second layer of Culligan G-50 media ensures efficient filtration of precipitated iron particles.

### Chemical-Free

Requires no chemicals for operation or reconditioning. Oxygen is automatically drawn into the tank during the regeneration cycle to replenish the air level to naturally clean your water.

### Know your water quality

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Ask your local Culligan dealer about available water testing options. The Culligan Analytical Laboratory offers a wide range of test panels for most any water problem.

### System Dimensions

Size	Service Flow	Media	Control Valve	A	B	C
10"	4 gpm @ 5 ppm Iron	2 layers plus gravel	1"	10"	54"	67"
